

Guide Repair prices – updated 13/3/24

Check and adjust

Check for airtightness, regulation, ring key height without dismantling instrument

Service

Strip instrument, oil body for wooden instruments, replace pads, springs and touch/bumper corks as required, reassemble checking pad seating and regulation.

Pad costs are variable dependent on the instrument, so charges will be variable, although smaller pads may be included in the service cost.

In general, cleaning and polishing will be included, but if very tarnished an extra charge may be made.

Repad

As service but replace all pads.

Overhaul

Replace all pads, springs and tenon corks, then as for service.
